

## IEEE PDF eXpress Instructions

**Important:** After proofreading and checking your paper with IEEE PDF eXpress, it must be submitted electronically through the WCCI 2008 Online Paper Submission using the **PDF format**.

WCCI 2008 has registered for use of a new IEEE tool: IEEE PDF eXpress. IEEE PDF eXpress is a free service to IEEE conferences that allows their authors to make IEEE Xplore-compatible PDFs (Conversion Function) or to check PDFs that authors have made themselves for IEEE eXpress compatibility (PDF Check function). *Prior to* submitting your camera-ready paper to the conference web site, please check acceptability of your paper at IEEE PDF eXpress as described in detail below.

### Steps for submission:

- 1) Create your manuscript(s),
- 2) Proofread and check layout of manuscript (it is highly recommended that you do this BEFORE going to IEEE PDF eXpress),
- 3) Create IEEE PDF eXpress account,
- 4) Upload source file(s) for Conversion; and/or PDF(s) for Checking,
- 5) Use IEEE PDF eXpress to attain IEEE Xplore-compatible PDF(s). The site contains extensive instructions, resources, helpful hints, and access to technical support,
- 6) Submit final, IEEE Xplore-compatible PDF(s) per the format instructions.

To access IEEE PDF eXpress, go to: <http://216.228.1.34/pdfexpress/log.asp>

IEEE PDF eXpress converts the following file types to PDF:

Rich Text Format

Freelance

(La)TeX (DVI and all support files required)\*

Pagemaker

Framemaker

QuarkXpress\*

Word Pro

Microsoft Word

Wordperfect

\*For documents created in formats that do not embed source files, include all support files with the final manuscript in a folder. Put this folder in a compressed archive for submission. If it is possible to embed images in the source document, you should do so to avoid potential issues, such as missing graphics.

**IMPORTANT:** A DVI (DeVice Independent file) is required for LaTeX conversions, in addition to the associated image files. Make sure that your LaTeX system can output a DVI, otherwise it cannot be converted. Be sure also to check that your images are properly referenced, and that DVI can handle the image file types used (DVI does not handle some newer image types, such as \*.png). Finally, any camera-ready papers generated by your LaTeX system **MUST** conform to the format and criteria specified in this MS Word template or risk being excluded from the Proceedings/CD-ROM.
